# AGATA DAQ

## Data flow monitoring

- Rates monitoring : Narval, GUI
- Spectra : GRU server
- Watcher (spy) : Jurek's on-line analysis + any other client

One needs in addition a Data Quality Monitor (DQM)

Check e.g. :

- Data are not corrupted
- Active detector deliver data
- Correlations between partitions (ancillaries)
- etc

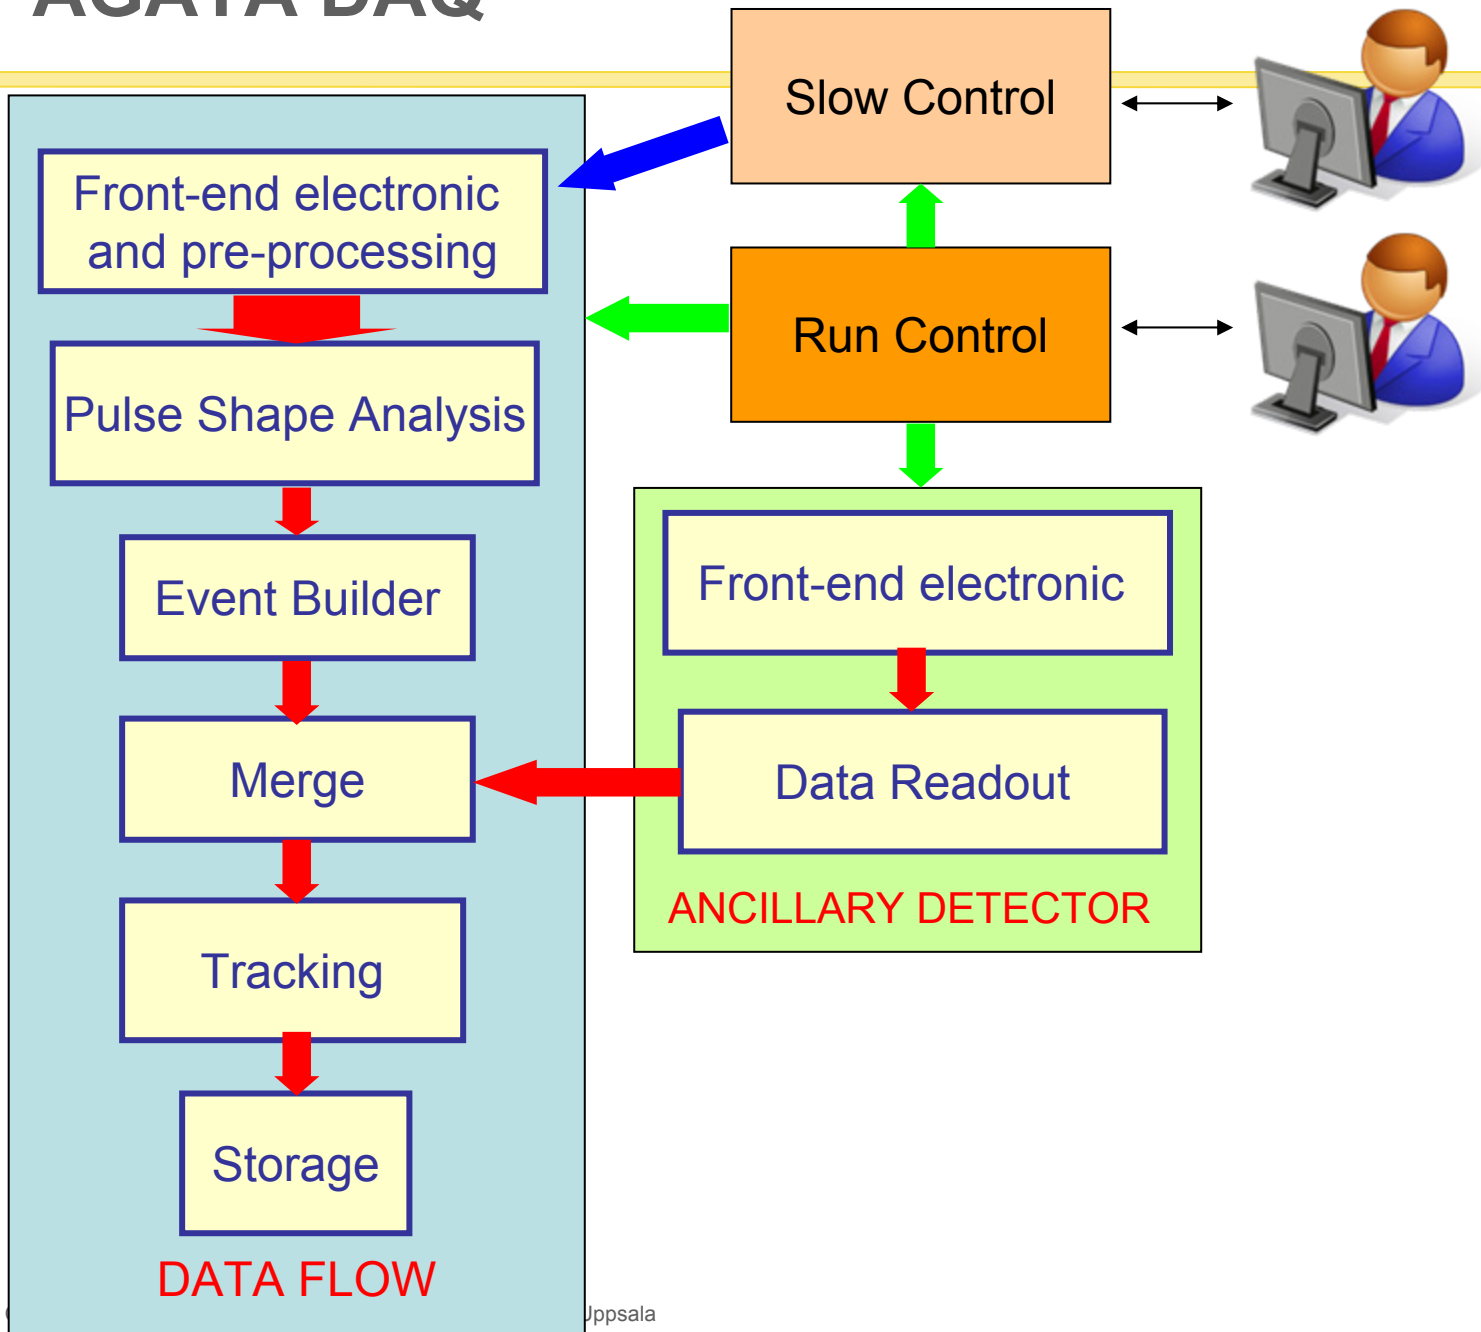

One needs a new team in charge of the DQM

(involves DAQ + Data Analysis + Ancillaries + ... )

Volunteers welcome
